## NOW IT'S OFFICIAL: FDA ANNOUNCED THAT VACCINES ARE CAUSING AUTISM!

Healthy & Happy -

THE FDA HAS PUBLISHED CONCLUSIVE PROOF ON THEIR WEBSITE THAT THE DTAP VACCINE CAN CAUSE AUTISM. ACCORDING TO THE FDA'S ONLINE BIOLOGICS BLOOD VACCINES DOCUMENT, A VACCINE MANUFACTURER ADMITS ON ITS PACKAGE INSERT THAT THEIR VACCINATION CAN CAUSE AUTISM AS ONE OF MANY ADVERSE REACTIONS.

### FDA Announced That Vaccines Are Causing Autism!

These adverse events reported during post-approval use of Tripedia vaccine include idiopathic thrombocytopenic purpura, SIDS, anaphylactic reaction, cellulitis, autism, convulsion/grand mal convulsion, encephalopathy, hypotonia, neuropathy, somnolence and apnea. Events were included in this list because of the seriousness or frequency of reporting. Because these events are reported voluntarily from a population of uncertain size, it is not always possible to reliably estimate their frequencies or to establish a causal relationship to components of Tripedia vaccine.

#### Additional Adverse Reactions:

- As with other aluminum-containing vaccines, a nodule may be palpable at the injection sites for several weeks. Sterile abscess formation at the site of injection has been reported.<sup>3,36</sup>
- Rarely, an anaphylactic reaction (ie, hives, swelling of the mouth, difficulty breathing, hypotension, or shock) has been reported after receiving preparations containing diphtheria, tetanus, and/or pertussis antigens.<sup>3</sup>
- Arthus-type hypersensitivity reactions, characterized by severe local reactions (generally starting 2-8 hours after an injection), may follow receipt of tetanus toxoid.
- A few cases of peripheral mononeuropathy and of cranial mononeuropathy have been reported following tetanus toxoid administration, although available evidence is inadequate to accept or reject a causal relation.<sup>37</sup>
- A review by the Institute of Medicine (IOM) found evidence for a causal relationship between tetanus toxoid and both brachial neuritis and Guillain-Barré syndrome.<sup>37</sup>
- A few cases of demyelinating diseases of the CNS have been reported following some tetanus toxoid-containing vaccines or tetanus and diphtheria toxoid-containing vaccines, although the IOM concluded that the evidence was inadequate to accept or reject a causal relationship.<sup>37</sup>

Adverse events reported during post-approval use of Tripedia vaccine include idiopathic thrombocytopenic purpura, SIDS, anaphylactic reaction, cellulitis, autism, convulsion/grand mal convulsion, encephalopathy, hypotonia, neuropathy, somnolence and apnea. Events were included in this list because of the seriousness or frequency of reporting. Because these events are reported voluntarily from a population of uncertain size, it is not always possible to reliably estimate their frequencies or to establish a causal relationship to components of Tripedia vaccine.<sup>2</sup>

The FDA's online Biologics Blood Vaccines document admits on its package insert that their vaccination can cause autism as one of many adverse reactions.

#### In this sense, it should be noted that:

Acellular Pertussis Vaccine Concentrates (For Further Manufacturing Use) are produced by The Research Foundation for Microbial Diseases of Osaka University (BIKEN), Osaka, Japan, under United States (US) license, and are combined with diphtheria and tetanus toxoids manufactured by Sanofi Pasteur Inc. Tripedia vaccine is filled, labeled, packaged, and released by Sanofi Pasteur Inc.

### What's in Tripedia that probably can interfere with brain chemistry and neurology?

According to the Tripedia's package insert, some ingredients include: Bovine extract, formaldehyde used to inactivate microorganisms a couple of times, ammonium sulfate, aluminum potassium sulfate and two growth mediums: modified Mueller and Miller is one; the other is Stainer-Scholte medium.

### What is the content of these two growth mediums?

Tripedia's ingredients include: Bovine extract, formaldehyde, ammonium sulfate, aluminum potassium sulfate, modified Mueller and Miller and Stainer-Scholte medium.

### Mueller and Miller medium, contains:

Glucose, sodium chloride, sodium phosphate dibasic, monopotassium, phosphate, magnesium sulfate hydrate, ferrous sulfate heptahydrate, cysteine hydrochloride, tyrosine hydrochloride, uracil

hydrochloride, Ca-pantothenate in ethanol, thiamine in ethanol, pyridoxine-hydrochloride in ethanol, riboflavin in ethanol, biotin in ethanol, sodium hydroxide, beef heart infusion (de-fatted beef heart and distilled water), casein [milk protein] solution. Basically a mixture of sugar, salt, amino acids, vitamins, and minerals.

**While Stainer-Scholte medium has the following ingredients:**

Tris hydrochloride, tris base, glutamate (monosodium salt) [MSG], proline, salt, monopotassium phosphate, potassium chloride, magnesium chloride, calcium chloride, ferrous sulfate, ascorbic acid, niacin, glutathione.

The vaccine is formulated without preservatives, but contains a trace amount of thimerosal [(mercury derivative), (<=0.3 µg mercury/dose)] from the manufacturing process. Each 0.5 mL dose also contains, by assay, not more than 0.170 mg of aluminum and not more than 100 µg(0.02%) of residual formaldehyde. The vaccine contains gelatin and polysorbate 80 (Tween-80), which are used in the production of the pertussis concentrate.

"Probable cause" ingredients for adverse reactions include: casein, to which some children are allergic; MSG—an excitotoxin; thimerosal-ethyl mercury; aluminum; formaldehyde; gelatin; and polysorbate 80.

You might be wondering:

**Why the doctors don't say anything about the risk of DTaP Vaccine?**

That is a question that many of us, still wondering! Maybe they just is just not convenient for them that we know about the risk of these vaccine

To take the vaccine debacle further, most of the mandated vaccines for infants and children, contain many of the above ingredients, which must be stopped from being injected into infants, toddlers, teens and even adults!

It's time for Congress to rescind the "Get out of Jail Free" card for vaccine makers and stop the aggressive onslaught of the Autism Spectrum Disorder that is depriving children of a fulfilling life and ruining families emotionally, financially, and physically to the point of parents divorcing because of the stresses of ASD in a family.

It's about time vaccines are publicly acknowledged by the feds and the media for all the health damages they have caused. Just check out the CDC's VAERS reports and the vaccine damage payouts by the HHS/HRSA. According to a new report published on March 1, 2017, by the department of health and human services of the United States, about \$ 3,363,282,409.21 have been paid for vaccine adverse reactions and deaths from 1989 to 2017 so far.

To conclude, what do you think about this? Tell us in the comment section below.
